b. In her search for material to be used in drawing up the proposed CI/CE Familiarization course, [REDACTED] has just finished a review of all old CE lectures and other material now available, and has found limited value in some of it. Items which have no future value have been destroyed and copies of lectures dating back to the 1950 period are being retired to the OTR Library for record purposes. [REDACTED] notes that her discussions with selected members of DD/P have revealed a serious handicap to this project, in that there is little collated information on the subject.
